Implementation Plan Template

SMART EUROPE is a project co-financed by the ERDF / Made possible by the INTERREG IVC

The objective of this template is to provide guidance to the SMART Europe project partners to think over and report their activities in a comprehensive way regarding the implementation of the results of their Peer Review and Good Practice transfers.

The first section contains general information about the project, the implementing region and the main funding sources available.

The second section focuses on the actions that the respective partner plans to implement. The format of this section is quite similar to the one used in the Action Plan – some parts might be copied to here –, but partners might also include their imported good practice.
